**Syllabus for M.Sc. – I.T.**

(June 2023 Onwards)

Programme: M.Sc.

Subject : Information Technology

Semester I & II

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

| <b>Semester I</b>  |                      |   |                |
|--------------------|----------------------|---|----------------|
| <b>Course Code</b> | <b>Course Type</b>   | <b>Course Title</b>                             | <b>Credits</b> |
| VGVPSTMDS101       | Major                | Data Science                                    | 4              |
| VGVPSTMDS101       | Major                | Data Science Practical                          | 2              |
| VGVPSTMSC101       | Major                | Soft Computing Techniques                       | 4              |
| VGVPSTMSCP101      | Major                | Soft Computing Techniques Practical             | 2              |
| VGVPSTMCC101       | Major                | Cloud Computing                                 | 2              |
| VGVPSTELP101       | Elective 1 (Any One) | Security Breaches and Countermeasures Practical | 4              |
| VGVPSTEL101        |                      | Data Center Technologies                        |                |
| VGVPSTEL102        |                      | Image Processing                                |                |

**(Autonomous)**

|   |                           |                          |              |
|---|---------------------------|--------------------------|--------------|
| <b>M. Sc (Information Technology)</b>     |                           | <b>Semester – I</b>      |              |
| Course Name: Data Science                 |                           | Course Code: VGVSTMDS101 |              |
| Periods per week (1 Period is 60 minutes) |                           | 4                        |              |
| Credits                                   |                           | 4                        |              |
|   |                           | <b>Hours</b>             | <b>Marks</b> |
| <b>Evaluation System</b>                  | <b>Theory Examination</b> | 2                        | 60           |
|   | <b>Internal</b>           | --                       | 40           |

**Course Objective**

To enable the learner to:

1. Develop in depth understanding of the key technologies in data science and business analytics: data mining, machine learning, visualization techniques, predictive modeling, and statistics.
2. Practice problem analysis and decision-making.
3. Gain practical, hands-on experience with statistics programming languages and big data tools through coursework and applied research experiences.
4. Understand data science methods to solve problems in real-world contexts.
5. Analyze the need for data preprocessing and visualization techniques.

| <b>Unit</b> | <b>Details</b>  | <b>Lectures</b> |
|-------------|---|-----------------|
| I           | <p><b>Data Science Introduction &amp; Basics</b></p> <p><b>Data Science Technology Stack:</b> Rapid Information Factory Ecosystem, Data Science Storage Tools, Data Lake, Data Vault, Data Warehouse Bus Matrix, Data Science Processing Tools ,Spark, Mesos, Akka , Cassandra, Kafka, Elastic Search, R ,Scala, Python, MQTT, The Future.</p> <p><b>Layered Framework:</b> Definition of Data Science Framework, Cross-Industry Standard Process for Data Mining (CRISP-DM), Homogeneous Ontology for Recursive Uniform Schema, The Top Layers of a Layered Framework, Layered Framework for High-Level Data Science and Engineering</p> <p><b>Business Layer:</b> Business Layer, Engineering a Practical Business Layer</p> <p><b>Utility Layer:</b> Basic Utility Design, Engineering a Practical Utility Layer</p> | 15              |
| II          | <b>Statistics for Data Science</b>  | 15              |

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

|     |   |    |
|-----|---|----|
|     | <p><b>Three Management Layers:</b> Operational Management Layer, Processing-Stream Definition and Management, Audit, Balance, and Control Layer, Balance, Control, Yoke Solution, Cause-and-Effect, Analysis System, Functional Layer, Data Science Process</p> <p><b>Retrieve Superstep:</b> Data Lakes, Data Swamps, Training the Trainer Model, Understanding the Business Dynamics of the Data Lake, Actionable Business Knowledge from Data Lakes, Engineering a Practical Retrieve Superstep, Connecting to Other Data Sources.</p> <p><b>Assess Superstep:</b> Assess Superstep, Errors, Analysis of Data, Practical Actions, Engineering a Practical Assess Superstep</p> |    |
| III | <p><b>Data Analysis with Python &amp; Data Visualization</b></p> <p>Process Superstep : Data Vault, Time-Person-Object-Location-Event Data Vault, Data Science Process</p> <p><b>Transform Superstep :</b> Transform Superstep, Building a Data Warehouse, Transforming with Data Science, Hypothesis Testing, Overfitting and Underfitting, Precision-Recall, Cross-Validation Test.</p>   | 15 |
| IV  | <p><b>Machine Learning for Data Science</b></p> <p><b>Transform Superstep:</b> Univariate Analysis, Bivariate Analysis, Multivariate Analysis, Linear Regression, Logistic Regression, Clustering Techniques, ANOVA, Principal Component Analysis (PCA), Decision Trees, Support Vector Machines, Networks, Clusters, and Grids, Data Mining, Pattern Recognition, Machine Learning, Bagging Data, Random Forests, Computer Vision (CV) , Natural Language Processing (NLP), Neural Networks, TensorFlow.</p> <p><b>Organize and Report Supersteps :</b> Organize Superstep, Report Superstep, Graphics, Pictures, Showing the Difference</p>                                     | 15 |

| Course Outcome          |  |
|-------------------------|--|
| Learner will be able to |  |
| <b>CO1</b>              | Apply quantitative modeling and data analysis techniques to the solution of real world business problems, communicate findings, and effectively present results using data visualization techniques. |
| <b>CO2</b>              | Apply algorithms to build machine intelligence.  |
| <b>CO3</b>              | Demonstrate knowledge of statistical data analysis techniques utilized in business decision making.  |
| <b>CO4</b>              | Apply principles of Data Science to the analysis of business problems.   |
| <b>CO5</b>              | Use data mining software to solve real-world problems.   |

**Course Objective**

To enable the learner to:

1. Work with Cassandra.
2. Get the understanding of data processing using R.
3. Get the knowledge of error management using Pandas.
4. Understand the concept of data generation, transformation and organization.
5. carry out data visualization using power BI.

**List of Practical:**

|    |  |
|----|--|
| 1. | Creating and using database in Cassandra   |
| 2. | Write the programs for the following: <ol style="list-style-type: none"> <li>i. Text Delimited CSV to HORUS format</li> <li>ii. XML to HORUS format</li> <li>iii. JSON to HORUS format</li> <li>iv. MySql database to HORUS format</li> <li>v. Picture(JPEG) to HORUS format</li> <li>vi. Video to HORUS format</li> <li>vii. Audio to HORUS format</li> </ol> |
| 3. | <ol style="list-style-type: none"> <li>i. Fixers Utilities</li> <li>ii. Data Binning or Bucketing</li> <li>iii. Averaging of data</li> <li>iv. Outlier Detection</li> <li>v. Logging</li> </ol>  |
| 4. | Perform following data processing using R <ol style="list-style-type: none"> <li>i. Program retrieve different attributes of data</li> <li>ii. Data pattern</li> <li>iii. Loading IP_DATA_ALL</li> </ol>   |
| 5. | Perform error management on the given data using pandas package  |

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

|     |  |
|-----|--|
|     | <ul style="list-style-type: none"> <li>i. Write python/R program to create the network routing diagram from the given data on routers</li> <li>ii. Write a python/R program to build acyclic graph</li> <li>iii. Write python/R program to pick the content for BillBoards from the given data</li> <li>iv. Write a python/R program to generate GML file from given csv file</li> <li>v. Write python/R program to plan location of warehouse from the given data</li> <li>vi. Write python/R program using data science via clustering to determine new warehouse using the given data</li> <li>vii. Using the given data Write python/R program to plan the shipping routers from best-fit international logistics</li> <li>viii. Write python/R program to delete the best packing option to ship in container from</li> <li>ix. the given data</li> <li>x. Write python program to create delivery route using the given data</li> <li>xi. Write python program to crate simple forex trading planner from the given data</li> <li>xii. Write python program to process the balance sheet to ensure the only good data is processing</li> <li>xiii. Write python program to generate payroll from the given data</li> </ul> |
| 6.  | Build the time hub, links and satellites   |
| 7.  | Transforming data  |
| 8.  | Organizing data  |
| 9.  | Generating data  |
| 10. | Data visualisation using power Bi  |

**Course Outcome**

**Learner will be able to**

**CO1** Handle Cassandra

**CO2** Write a program for various conversions like video to HOURS, XML to HOURS etc.

**CO3** Performs operations on data like Averaging of data, Outlier Detection, logging etc.

**CO4** Write a python/R program for error management.

**CO5** Use power BI for visualization.

|  | <b>Internal</b>           | <b>--</b>                      | <b>40</b>    |

**Course Objective**

To enable learners understand

1. Various types of soft computing techniques and applications of soft computing.
2. Concept of artificial neural network and supervised learning network.
3. Concept of unsupervised learning network, special network, third generation network.
4. Concept of fuzzy logic, fuzzy sets, fuzzification and defuzzification.
5. Fuzzy Rule base and Approximate reasoning. Genetic algorithms, Differential Evolution Algorithm.

| <b>Unit</b> | <b>Details</b>  | <b>Lectures</b> |
|-------------|---|-----------------|
| I           | <p><b>Introduction of soft computing</b> : soft computing vs. hard computing, various types of soft computing techniques, Fuzzy Computing, Neural Computing, Genetic Algorithms, Associative Memory, Adaptive Resonance Theory, Classification, Clustering, Bayesian Networks, Probabilistic reasoning, applications of soft computing.</p> <p><b>Artificial Neural Network</b> : Fundamental concept, Evolution of Neural Networks, Basic Models, McCulloh-Pitts Neuron, Linear Separability, Hebb Network.</p> <p><b>Supervised Learning Network</b> : Perceptron Networks, Adaptive Linear Neuron, Multiple Adaptive Linear Neurons, Backpropagation Network, Radial Basis Function, Time Delay Network, Functional Link Networks, Tree Neural Network</p> | 15              |
| II          | <p><b>Associative Memory Networks</b> : Training algorithm for pattern Association, Autoassociative memory network, hetroassociative memory network, bi-directional associative memory, Hopfield networks, iterative autoassociative memory networks, temporal associative memory networks. Kohonen self-</p>   | 15              |

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

|     |  |    |
|-----|--|----|
|     | <p>organizing feature maps, learning vectors quantization, counter propagation networks, adaptive resonance theory networks.</p> <p><b>Special Networks</b> : Simulated annealing, Boltzman machine, Gaussian Machine, Cauchy Machine, Probabilistic neural net, cascade correlation network, cognition network, neo-cognition network, cellular neural network, optical neural network</p> <p><b>Third Generation Neural Networks</b> : Spiking Neural networks, convolutional neural networks, deep learning neural networks, extreme learning machine model.</p> <p><b>UnSupervised Learning Networks</b> : Fixed weight competitive nets</p>   |    |
| III | <p><b>Introduction to Fuzzy Logic, Classical Sets and Fuzzy sets</b> : Classical sets, Fuzzy sets.</p> <p><b>Classical Relations and Fuzzy Relations</b> : Cartesian Product of relation, classical relation, fuzzy relations, tolerance and equivalence relations, non-iterative fuzzy sets.</p> <p><b>Membership Function</b> : features of the membership functions, fuzzification, methods of membership value assignments.</p> <p><b>Defuzzification</b> : Lambda-cuts for fuzzy sets, Lambda-cuts for fuzzy relations, Defuzzification methods.</p> <p><b>Fuzzy Arithmetic and Fuzzy measures</b> : fuzzy arithmetic, fuzzy measures, measures of fuzziness, fuzzy integrals.</p>  | 15 |
| IV  | <p><b>Fuzzy Rule base and Approximate reasoning</b> : Fuzzy proportion, formation of rules, decomposition of rules, aggregation of fuzzy rules, fuzzy reasoning, fuzzy inference systems, Fuzzy logic control systems, control system design, architecture and operation of FLC system, FLC system models and applications of FLC System.</p> <p><b>Genetic Algorithm</b> : Biological Background, Traditional optimization and search techniques, genetic algorithm and search space, genetic algorithm vs. traditional algorithms, basic terminologies, simple genetic algorithm, general genetic algorithm, operators in genetic algorithm, stopping condition for genetic algorithm flow, constraints in genetic algorithm, problem solving using genetic algorithm, the schema theorem, classification of genetic algorithm, Holland classifier systems, genetic programming, advantages and limitations and applications of genetic algorithm. Differential Evolution Algorithm, Hybrid soft computing techniques – neuro – fuzzy hybrid, genetic neuro-hybrid systems, genetic fuzzy hybrid and fuzzy genetic hybrid systems.</p> | 15 |

**Course Objective**

To enable learners understand the concept of implementation of

1. McCulloch-Pitts neural net.
2. Hebb's rule, delta rule, Hopfield Network etc
3. Back Propagation Algorithm, error Backpropagation algorithm.
4. Kohonen Self organizing map, Linear separation, etc.
5. Fuzzy logic, generic algorithm.

**List of Practical:**

|    |   |
|----|---|
| 1. | <b>Implement the following:</b><br>Design a simple linear neural network model.<br>Calculate the output of neural net using both binary and bipolar sigmoidal function. |
| 2. | Implement the following:<br>Generate AND/NOT function using McCulloch-Pitts neural net.<br>Generate XOR function using McCulloch-Pitts neural net.                      |
| 3. | Implement the Following<br>Write a program to implement Hebb's rule.<br>Write a program to implement of delta rule.   |
| 4, | Implement the Following<br>Write a program for Back Propagation Algorithm<br>Write a program for error Backpropagation algorithm.                                       |
| 5. | Implement the Following<br>Write a program for Hopfield Network.<br>Write a program for Radial Basis function   |
| 6. | Implement the Following<br>Kohonen Self organizing map<br>Adaptive resonance theory   |

**The Kelkar Education Trust's  
V G Vaze College of Arts, Science and Commerce  
(Autonomous)**

|     |  |
|-----|--|
| 7.  | Implement the Following<br>Write a program for Linear separation.<br>Write a program for Hopfield network model for associative memory |
| 8.  | Implement the Following<br>Membership and Identity Operators   in, not in,<br>Membership and Identity Operators is, is not             |
| 9.  | Implement the Following<br>Find ratios using fuzzy logic<br>Solve Tipping problem using fuzzy logic                                    |
| 10. | Implement the Following<br>Implementation of Simple genetic algorithm<br>Create two classes: City and Fitness using Genetic algorithm  |

| <b>Course Outcome</b>          |  |
|--------------------------------|--|
| <b>Learner will be able to</b> |  |
| <b>CO1</b>                     | Identify and describe soft computing techniques and their roles in building intelligent machines |
| <b>CO2</b>                     | Recognize the feasibility of applying a soft computing methodology for a particular problem      |
| <b>CO3</b>                     | Apply fuzzy logic and reasoning to handle uncertainty and solve engineering problems             |
| <b>CO4</b>                     | Apply genetic algorithms to combinatorial optimization problems                                  |
| <b>CO5</b>                     | Apply neural networks for classification and regression problems                                 |
| <b>CO6</b>                     | Effectively use existing software tools to solve real problems using a soft computing approach   |
| <b>CO7</b>                     | Evaluate and compare solutions by various soft computing approaches for a given problem          |

**Course Objective**

Make learners

1. To learn how to use Cloud Services.
2. To implement Virtualization.
3. To implement Task Scheduling algorithms.
4. To apply Map-Reduce concept to applications.
5. To build a Private Cloud.

| <b>Unit</b> | <b>Details</b>  | <b>Lectures</b> |
|-------------|---|-----------------|
| I           | <p><b>Introduction to Cloud Computing :</b> Introduction, Historical developments, Building Cloud Computing Environments,</p> <p><b>Principles of Parallel and Distributed Computing :</b> Eras of Computing, Parallel v/s distributed computing, Elements of Parallel Computing, Elements of distributed computing, Technologies for distributed computing.</p> <p><b>Virtualization :</b> Introduction, Characteristics of virtualized environments, Taxonomy of virtualization techniques, Virtualization and cloud computing, Pros and cons of virtualization, Technology examples. Logical Network Perimeter, Virtual Server, Cloud Storage Device, Cloud usage monitor, Resource replication, Ready-made environment.</p> | 15              |
| II          | <p><b>Cloud Computing Architecture:</b> Introduction, Fundamental concepts and models, Roles and boundaries, Cloud Characteristics, Cloud Delivery models, Cloud Deployment models, Economics of the cloud, Open challenges.</p> <p>Fundamental Cloud Security: Basics, Threat agents, Cloud security threats, additional considerations.</p> <p><b>Industrial Platforms and New Developments:</b> Amazon Web Services, Google App Engine, Microsoft Azure.</p>   | 15              |

**Course Objective**

To make learners understand and use

1. To get the insight of the security loopholes in every aspect of computing.
2. To understand the threats and different types of attacks that can be launched on computing systems.
3. To know the countermeasures that can be taken to prevent attacks on computing systems.
4. To test the software against attacks.
5. To analyse vulnerability

**List of Practical:**

| Course Outcome            |   |
|---------------------------|---|
| Learner should be able to |   |
| <b>CO1</b>                | Identify the different security breaches that can occur. The student should be able to evaluate the security of an organization and identify the loopholes. The student should be able to perform enumeration and network scanning.   |
| <b>CO2</b>                | Identify the vulnerability in the systems, breach the security of the system, identify the threats due to malware and sniff the network. The student should be able to do the penetration testing to check the vulnerability of the system towards malware and network sniffing.  |
| <b>CO3</b>                | Perform social engineering and educate people to be careful from attacks due to social engineering, understand and launch DoS and DDoS attacks, hijack and active session and evade IDS and Firewalls. This should help the students to make the organization understand the threats in their systems and build robust systems. |
| <b>CO4</b>                | Identify the vulnerabilities in the Web Servers, Web Applications, perform SQL injection and get into the wireless networks. The student should be able to help the organization be aware about these vulnerabilities in their systems.   |
| <b>CO5</b>                | Identify the vulnerabilities in the newer technologies like mobiles, IoT and cloud computing. The student should be able to use different methods of cryptography.  |

**Course Objective**

To make learners understand and use

1. Identify important requirements to design and support a data center.
2. Determine a data center environment's requirements including systems and network architecture as well as services.
3. Evaluate options for server farms, network designs, high availability, load balancing, data center services, and trends that might affect data center designs.
4. Assess threats, vulnerabilities and common attacks, and network security devices available to protect data centers.
5. Design a data center infrastructure integrating features that address security, performance, and availability.
6. Measure data center traffic patterns and performance metrics.

**Course Objective**

To make learners understand and use

1. Review the fundamental concepts of a digital image processing system.
2. Analyze images in the frequency domain using various transforms.
3. Evaluate the techniques for image enhancement and image restoration.
4. Categorize various compression techniques.
5. Interpret Image compression standards.
6. Interpret image segmentation and representation techniques.

| <b>Unit</b> | <b>Details</b>   | <b>Lectures</b> |
|-------------|--|-----------------|
| I           | <b>Introduction:</b> Digital Image Processing, Origins of Digital Image Processing, Applications and Examples of Digital Image Processing, Fundamental Steps in Digital Image Processing, Components of an Image Processing System, Digital Image Fundamentals: Elements of Visual Perception, Light and the Electromagnetic Spectrum, Image Sensing and Acquisition, Image Sampling and Quantization, Basic Relationships Between Pixels, Basic Mathematical Tools Used in Digital Image Processing, Intensity Transformations and Spatial Filtering: Basics, Basic Intensity Transformation Functions, Basic Intensity Transformation Functions, Histogram Processing, Fundamentals of Spatial Filtering, Smoothing (Lowpass) Spatial Filters, Sharpening (Highpass) Spatial Filters, Highpass, Bandreject, and Bandpass Filters from Lowpass Filters, Combining Spatial Enhancement Methods, Using Fuzzy Techniques for Intensity Transformations and Spatial Filtering | 15              |
| II          | <b>Filtering in the Frequency Domain:</b> Background, Preliminary Concepts, Sampling and the Fourier Transform of Sampled Functions, The Discrete Fourier Transform of One Variable, Extensions to Functions of Two Variables, Properties of the 2-D DFT and IDFT, Basics of Filtering in the Frequency Domain, Image  | 15              |

| <b>Course Outcome</b>          |   |
|--------------------------------|---|
| <b>Learner will be able to</b> |   |
| <b>CO1</b>                     | Understand the relevant aspects of digital image representation and their practical implications.   |
| <b>CO2</b>                     | Have the ability to design pointwise intensity transformations to meet stated specifications.   |
| <b>CO3</b>                     | Understand 2-D convolution, the 2-D DFT, and have the ability to design systems using these concepts.   |
| <b>CO4</b>                     | Have a command of basic image restoration techniques.   |
| <b>CO5</b>                     | Understand the role of alternative color spaces, and the design requirements leading to choices of color space.   |
| <b>CO6</b>                     | Appreciate the utility of wavelet decompositions and their role in image processing systems.  |
| <b>CO7</b>                     | Have an understanding of the underlying mechanisms of image compression, and the ability to design systems using standard algorithms to meet design specifications. |

**Course Objective**

To make learners understand and use

1. To provide an overview of an exciting growing field of big data analytics.
2. To introduce the tools required to manage and analyze big data like Hadoop, NoSql MapReduce.
3. To teach the fundamental techniques and principles in achieving big data analytics with scalability and streaming capability.
4. To enable students to have skills that will help them to solve complex real-world problems in for decision support

| <b>Unit</b> | <b>Details</b>  | <b>Lectures</b> |
|-------------|---|-----------------|
| I           | <p><b>Introduction :</b> Introduction to Big Data, Characteristics of Data, and Big Data Evolution of Big Data, Definition of Big Data, Challenges with big data, Why Big data? Data Warehouse environment, Traditional Business Intelligence versus Big Data. State of Practice in Analytics, Key roles for New Big Data Ecosystems, Examples of big Data Analytics.</p> <p>Big Data Analytics, Introduction to big data analytics, Classification of Analytics, Challenges of Big Data, Importance of Big Data, Big Data Technologies, Data Science, Responsibilities, Soft state eventual consistency. Data Analytics Life Cycle</p> | 15              |
| II          | <p><b>Analytical Theory and Methods:</b> Clustering and Associated Algorithms, Association Rules, Apriori Algorithm, Candidate Rules, Applications of Association Rules, Validation and Testing, Diagnostics, Regression, Linear Regression, Logistic Regression, Additional Regression Models.</p> <p><b>Analytical Theory and Methods:</b> Classification, Decision Trees, Naïve Bayes, Diagnostics of Classifiers, Additional Classification Methods, Time Series Analysis, Box Jenkins methodology, ARIMA Model, Additional methods. Text Analysis, Steps, Text Analysis Example, Collecting Raw Text,</p>                          | 15              |

**(Autonomous)**

|     |   |    |
|-----|---|----|
|     | Representing Text, Term Frequency-Inverse Document Frequency (TFIDF), Categorizing Documents by Topics, Determining Sentiments  |    |
| III | Data Product, Building Data Products at Scale with Hadoop, Data Science Pipeline and Hadoop Ecosystem, Operating System for Big Data, Concepts, Hadoop Architecture, Working with Distributed file system, Working with Distributed Computation, Framework for Python and Hadoop Streaming, Hadoop Streaming, MapReduce with Python, Advanced MapReduce. In-Memory Computing with Spark, Spark Basics, Interactive Spark with PySpark, Writing Spark Applications | 15 |
| IV  | Distributed Analysis and Patterns, Computing with Keys, Design Patterns, Last- Mile Analytics, Data Mining and Warehousing, Structured Data Queries with Hive, HBase, Data Ingestion, Importing Relational data with Sqoop, Injesting stream data with flume. Analytics with higher level APIs, Pig, Spark's higher level APIs.   | 15 |

**Course Outcome**

**Learner will be able to**

**CO1** Understand the characteristics of Big Data and its related concepts.

**CO2** Understand the analytical theory and its methods, Classification methods

**CO3** Familiarize with Hadoop Architecture, Hadoop Ecosystem, and Working with Distributed file systems.

**CO4** Know the softwares available and used for Big Data Analysis

**CO5** Make a choice of tools(Hadoop, NoSql MapReduce) for analysis of Big Data

**Course Objective**

To make learners understand

1. The installation of Hadoop and HDFS.
2. get the knowledge of implementation of MapReduce for word count/ frequency, processing of weather dataset.
3. The configuration of Hive and applications in Hive.
4. Implement classification techniques like Decision tree, SVM .
5. the working of Regression Model, Multiple Regression Model, Classification Model, Clustering Model

**List of Practical:**

|    |   |
|----|---|
| 1. | Install, configure and run Hadoop and HDFS and explore HDFS.  |
| 2. | Implement word count / frequency programs using MapReduce   |
| 3. | Implement MapReduce program that processes a weather dataset.   |
| 4, | Implement an application that stores big data in Hbase / MongoDB and manipulate it using R / Python   |
| 5. | Implement the program in practical 4 using Pig.   |
| 6. | Configure the Hive and implement the application in Hive.   |
| 7. | Write a program to illustrate the working of Jaql.  |
| 8. | Implement the following:<br>a. Implement Decision tree classification techniques<br>b. Implement SVM classification techniques  |
| 9. | Solve the following:<br><b>a. REGRESSION MODEL</b><br>Import data from web storage. Name the dataset and now do Logistic Regression to find out relation between variables that are affecting the admission of a student in an institute based on his or her GRE score, GPA obtained and rank of the student. Also check the model is fit or not. require (foreign), require(MASS). |

**The Kelkar Education Trust's  
V G Vaze College of Arts, Science and Commerce  
(Autonomous)**

|     |  |
|-----|--|
|     | <p><b>b. MULTIPLE REGRESSION MODEL</b><br/>Apply multiple regressions, if data have a continuous independent variable. Apply on above dataset.</p>   |
| 10. | <p>Solve the Following:</p> <p><b>a. CLASSIFICATION MODEL</b></p> <ol style="list-style-type: none"> <li>i. Install relevant package for classification.</li> <li>ii. Choose classifier for classification problem.</li> <li>iii. Evaluate the performance of classifier.</li> </ol> <p><b>b. CLUSTERING MODEL</b></p> <ol style="list-style-type: none"> <li>i. Clustering algorithms for unsupervised classification.</li> <li>ii. b. Plot the cluster data using R visualizations.</li> </ol> |

| <b>Course Outcome</b>          |   |
|--------------------------------|---|
| <b>Learner will be able to</b> |   |
| <b>CO1</b>                     | Install, configure and run Hadoop, HDFS and explore HDFS  |
| <b>CO2</b>                     | Understand the key issues in big data management and its associated applications in intelligent business and scientific computing.  |
| <b>CO3</b>                     | Acquire fundamental enabling techniques and scalable algorithms like Hadoop, Map Reduce and NO SQL in big data analytics.           |
| <b>CO4</b>                     | Interpret business models and scientific computing paradigms, and apply software tools for big data analytics.                      |
| <b>CO5</b>                     | Achieve adequate perspectives of big data analytics in various applications like recommender systems, social media applications etc |

**Course Objective**

To make learners understand and use

1. To understand the state-of-the-art in network protocols, architectures and applications.
2. Analyze existing network protocols and networks.
3. Develop new protocols in networking
4. To understand how networking research is done
5. To investigate novel ideas in the area of Networking via term-long research projects

| Unit | Details  | Lectures |

**Course Objective**

To make learners understand

1. Concept of SLA Tracking, Path Control Topology, AS\_PATH attribute etc.
2. Configuration of iBGP, EBGP.
3. Configuration of PBR, Inter-VLAN Routing.
4. Concept of IP Service Level Agreements.
5. Simulation of SDN, OpenFlow, MPLS..

**List of Practical:**

|     |   |
|-----|---|
| 1.  | Configure IP SLA Tracking and Path Control Topology   |
| 2.  | Using the AS_PATH Attribute   |
| 3.  | Configuring IBGP and EBGP Sessions, Local Preference, and MED   |
| 4.  | Secure the Management Plane   |
| 5.  | Configure and Verify Path Control Using PBR   |
| 6.  | IP Service Level Agreements and Remote SPAN in a Campus Environment   |
| 7.  | Inter-VLAN Routing  |
| 8.  | Simulating MPLS environment and Simulating VRF  |
| 9.  | Simulating SDN with <ul style="list-style-type: none"> <li>● OpenDaylight SDN Controller with the Mininet Network Emulator</li> <li>● OFNet SDN network emulator</li> </ul> |
| 10. | Simulating OpenFlow Using MININET   |

**Course Objective**

To make learners understand and use

1. Gain a thorough understanding of the philosophy and architecture of Web applications using ASP.NET Core MVC
2. Gain a practical understanding of .NET Core.
3. Acquire a working knowledge of Web application development using ASP.NET Core MVC 6 and Visual Studio
4. Persist data with XML Serialization and ADO.NET with SQL Server Create HTTP services using ASP.NET Core Web API.
5. Deploy ASP.NET Core MVC applications to the Windows Azure cloud

| <b>Unit</b> | <b>Details</b>  | <b>Lectures</b> |
|-------------|---|-----------------|
| I           | <p><b>Microservices:</b> Understanding Microservices, Adopting Microservices, The Microservices Way. <b>Microservices Value Proposition:</b> Deriving Business Value, defining a Goal-Oriented, Layered Approach, Applying the Goal-Oriented, Layered Approach. <b>Designing Microservice Systems:</b> The Systems Approach to Microservices, A Microservices Design Process, Establishing a Foundation</p> <p>Goals and Principles, Platforms, Culture.</p>  | 15              |
| II          | <p><b>Service Design:</b> Microservice Boundaries, API design for Microservices, Data and Microservices, Distributed Transactions and Sagas, Asynchronous Message- Passing and Microservices, dealing with Dependencies, <b>System Design and Operations:</b> Independent Deployability, More Servers, Docker and Microservices, Role of Service Discovery, Need for an API Gateway, Monitoring and Alerting.</p> <p><b>Adopting Microservices in Practice:</b> Solution Architecture Guidance, Organizational Guidance, Culture Guidance, Tools and Process Guidance, Services Guidance.</p> | 15              |

|   |                              | <b>Hours</b>                      | <b>Marks</b> |
| <b>Evaluation System</b>                          | <b>Practical Examination</b> | <b>3</b>                          | <b>100</b>   |

**Course Objective**

To make learners understand and use

1. To understand the type of malware and its functionality.
2. Determine how the system was infected by malware and define if it was a targeted attack or a phishing attack.
3. How malware communicates with an attacker.
4. Future detection of malware and generating signatures.
5. Investigate, detect, and respond to various types of malware threat.

**List of Practical:**

|    |  |
|----|--|
| 1. | <b>a. Files: <i>Lab01-01.exe</i> and <i>Lab01-01.dll</i>.</b>  |
|    | i. Upload the files to <a href="http://www.VirusTotal.com/">http://www.VirusTotal.com/</a> and view the reports. Does either file match any existing antivirus signatures? |
|    | ii. When were these files compiled?  |
|    | iii. Are there any indications that either of these files is packed or obfuscated? If so, what are these indicators?   |
|    | iv. Do any imports hint at what this malware does? If so, which imports are they?  |
|    | v. Are there any other files or host-based indicators that you could look for on infected systems?   |
|    | vi. What network-based indicators could be used to find this malware on infected machines?   |
|    | vii. What would you guess is the purpose of these files?   |
|    | <b>b. Analyze the file <i>Lab01-02.exe</i>.</b>  |
|    | i. Upload the <i>Lab01-02.exe</i> file to <a href="http://www.VirusTotal.com/">http://www.VirusTotal.com/</a> . Does it match any existing antivirus definitions?          |
|    | ii. Are there any indications that this file is packed or obfuscated? If so, what are these indicators? If the file is packed, unpack it if possible.                      |
|    | iii. Do any imports hint at this program's functionality? If so, which imports are they and what do they tell you?   |

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

|  |  |
|--|--|
|  | iv. What host- or network-based indicators could be used to identify this malware on infected machines?  |
|  | <b>c. Analyze the file Lab01-03.exe.</b>   |
|  | i. Upload the <i>Lab01-03.exe</i> file to <a href="http://www.VirusTotal.com/">http://www.VirusTotal.com/</a> . Does it match any existing antivirus definitions?                    |
|  | ii. Are there any indications that this file is packed or obfuscated? If so, what are these indicators? If the file is packed, unpack it if possible.                                |
|  | iii. Do any imports hint at this program's functionality? If so, which imports are they and what do they tell you?   |
|  | iv. What host- or network-based indicators could be used to identify this malware on infected machines?  |
|  | <b>d. Analyze the file Lab01-04.exe.</b>   |
|  | i. Upload the <i>Lab01-04.exe</i> file to <a href="http://www.VirusTotal.com/">http://www.VirusTotal.com/</a> . Does it match any existing antivirus definitions?                    |
|  | ii. Are there any indications that this file is packed or obfuscated? If so, what are these indicators? If the file is packed, unpack it if possible.                                |
|  | iii. When was this program compiled?   |
|  | iv. Do any imports hint at this program's functionality? If so, which imports are they and what do they tell you?  |
|  | v. What host- or network-based indicators could be used to identify this malware on infected machines?   |
|  | vi. This file has one resource in the resource section. Use Resource Hacker to examine that resource, and then use it to extract the resource. What can you learn from the resource? |
|  | <b>e. Analyze the malware found in the file Lab03-01.exe using basic dynamic analysis tools.</b>   |
|  | i. What are this malware's imports and strings?  |
|  | ii. What are the malware's host-based indicators?  |
|  | iii. Are there any useful network-based signatures for this malware? If so, what are they?   |
|  | <b>f. Analyze the malware found in the file Lab03-02.dll using basic dynamic analysis tools.</b>   |
|  | i. How can you get this malware to install itself?   |
|  | ii. How would you get this malware to run after installation?  |
|  | iii. How can you find the process under which this malware is running?   |
|  | iv. Which filters could you set in order to use procmon to glean information?  |
|  | v. What are the malware's host-based indicators?   |
|  | vi. Are there any useful network-based signatures for this malware?  |
|  | <b>g. Execute the malware found in the file Lab03-03.exe while monitoring it using basic dynamic analysis tools in a safe environment</b>  |

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

|    |  |
|----|--|
|    | i. What do you notice when monitoring this malware with Process Explorer?  |
|    | ii. Can you identify any live memory modifications?  |
|    | iii. What are the malware's host-based indicators?   |
|    | iv. What is the purpose of this program?   |
|    | <b>h. Analyze the malware found in the file Lab03-04.exe using basic dynamic analysis tools.</b>   |
|    | i. What happens when you run this file?  |
|    | ii. What is causing the roadblock in dynamic analysis?   |
|    | iii. Are there other ways to run this program?   |
|    |  |
| 2. | <b>a. Analyze the malware found in the file Lab05-01.dll using only IDA Pro. The goal of this lab is to give you hands-on experience with IDA Pro. If you've already worked with IDA Pro, you may choose to ignore these questions and focus on reverse-engineering the malware.</b> |
|    | i. What is the address of DllMain?   |
|    | ii. Use the Imports window to browse to gethostbyname. Where is the import located?  |
|    | iii. How many functions call gethostbyname?  |
|    | iv. Focusing on the call to gethostbyname located at 0x10001757, can you figure out which DNS request will be made?  |
|    | v. How many local variables has IDA Pro recognized for the subroutine at 0x10001656?   |
|    | vi. How many parameters has IDA Pro recognized for the subroutine at 0x10001656?   |
|    | vii. Use the Strings window to locate the string \cmd.exe /c in the disassembly. Where is it located?  |
|    | viii. What is happening in the area of code that references \cmd.exe/c?  |
|    | ix. In the same area, at 0x100101C8, it looks like dword_1008E5C4 is a global variable that helps decide which path to take. How does the malware set dword_1008E5C4? (Hint: Use dword_1008E5C4's cross-references.)   |
|    | x. A few hundred lines into the subroutine at 0x1000FF58, a series of comparisons use memcmp to compare strings. What happens if the string comparison to robotwork is successful (when memcmp returns 0)?   |
|    | xi. What does the export PSLIST do?  |
|    | xii. Use the graph mode to graph the cross-references from sub_10004E79. Which API functions could be called by entering this function? Based on the API functions alone, what could you rename this function?   |
|    | xiii. How many Windows API functions does DllMain call directly? How many at a depth of 2?   |

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

|   |  |
|---|--|
| xiv.  | At 0x10001358, there is a call to Sleep (an API function that takes one parameter containing the number of milliseconds to sleep). Looking backward through the code, how long will the program sleep if this code executes?   |
| xv.   | At 0x10001701 is a call to socket. What are the three parameters?  |
| xvi.  | Using the MSDN page for socket and the named symbolic constants functionality in IDA Pro, can you make the parameters more meaningful? What are the parameters after you apply changes?  |
| xvii.   | Search for usage of the in instruction (opcode 0xED). This instruction is used with a magic string VMXh to perform VMware detection. Is that in use in this malware? Using the cross-references to the function that executes the in instruction, is there further evidence of VMware detection? |
| xviii.  | Jump your cursor to 0x1001D988. What do you find?  |
| xix.  | If you have the IDA Python plug-in installed (included with the commercial version of IDA Pro), run <i>Lab05-01.py</i> , an IDA Pro Python script provided with the malware for this book. (Make sure the cursor is at 0x1001D988.) What happens after you run the script?                       |
| xx.   | With the cursor in the same location, how do you turn this data into a single ASCII string?  |
| xxi.  | Open the script with a text editor. How does it work?  |
| <b>b. analyze the malware found in the file Lab06-01.exe.</b> |  |
| i.  | What is the major code construct found in the only subroutine called by main?  |
| ii.   | What is the subroutine located at 0x40105F?  |
| iii.  | What is the purpose of this program?   |
| <b>c. Analyze the malware found in the file Lab06-02.exe.</b> |  |
| i.  | What operation does the first subroutine called by main perform?   |
| ii.   | What is the subroutine located at 0x40117F?  |
| iii.  | What does the second subroutine called by main do?   |
| iv.   | What type of code construct is used in this subroutine?  |
| v.  | Are there any network-based indicators for this program?   |
| vi.   | What is the purpose of this malware?   |
| <b>d. analyze the malware found in the file Lab06-03.exe.</b> |  |
| i.  | Compare the calls in main to Lab 6-2's main method. What is the new function called from main?   |
| ii.   | What parameters does this new function take?   |
| iii.  | What major code construct does this function contain?  |
| iv.   | What can this function do?   |
| v.  | Are there any host-based indicators for this malware?  |
| vi.   | What is the purpose of this malware?   |

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

|    |   |
|----|---|
|    | <b>e. analyze the malware found in the file Lab06-04.exe.</b>   |
|    | i. What is the difference between the calls made from the main method in Labs 6-3 and 6-4?  |
|    | ii. What new code construct has been added to main?   |
|    | iii. What is the difference between this lab's parse HTML function and those of the previous labs?  |
|    | iv. How long will this program run? (Assume that it is connected to the Internet.)  |
|    | v. Are there any new network-based indicators for this malware?   |
|    | vi. What is the purpose of this malware?  |
| 3. | <b>a. Analyze the malware found in the file Lab07-01.exe.</b>   |
|    | i. How does this program ensure that it continues running (achieves persistence) when the computer is restarted?  |
|    | ii. Why does this program use a mutex?  |
|    | iii. What is a good host-based signature to use for detecting this program?   |
|    | iv. What is a good network-based signature for detecting this malware?  |
|    | v. What is the purpose of this program?   |
|    | vi. When will this program finish executing?  |
|    | <b>b. Analyze the malware found in the file Lab07-02.exe.</b>   |
|    | i. How does this program achieve persistence?   |
|    | ii. What is the purpose of this program?  |
|    | iii. When will this program finish executing?   |
|    | <b>c. For this lab, we obtained the malicious executable, Lab07-03.exe, and DLL, Lab07-03.dll, prior to executing. This is important to note because the malware might change once it runs. Both files were found in the same directory on the victim machine. If you run the program, you should ensure that both files are in the same directory on the analysis machine. A visible IP string beginning with 127 (a loopback address) connects to the local machine. (In the real version of this malware, this address connects to a remote machine, but we've set it to connect to localhost to protect you.)</b> |
|    | i. How does this program achieve persistence to ensure that it continues running when the computer is restarted?  |
|    | ii. What are two good host-based signatures for this malware?   |
|    | iii. What is the purpose of this program?   |
|    | iv. How could you remove this malware once it is installed?   |
|    | <b>d. Analyze the malware found in the file Lab09-01.exe using OllyDbg and IDA Pro to answer the following questions. This malware was initially analyzed in the Chapter 3 labs using basic static and dynamic analysis techniques.</b>   |
|    | i. How can you get this malware to install itself?  |

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

|  |  |
|--|--|
|  | ii. What are the command-line options for this program? What is the pass- word requirement?  |
|  | iii. How can you use OllyDbg to permanently patch this malware, so that it doesn't require the special command-line password?  |
|  | iv. What are the host-based indicators of this malware?  |
|  | v. What are the different actions this malware can be instructed to take via the network?  |
|  | vi. Are there any useful network-based signatures for this malware?  |
|  | <b>e. Analyze the malware found in the file Lab09-02.exe using OllyDbg to answer the following questions.</b>  |
|  | i. What strings do you see statically in the binary?   |
|  | ii. What happens when you run this binary?   |
|  | iii. How can you get this sample to run its malicious payload?   |
|  | iv. What is happening at 0x00401133?   |
|  | v. What arguments are being passed to subroutine 0x00401089?   |
|  | vi. What domain name does this malware use?  |
|  | vii. What encoding routine is being used to obfuscate the domain name?   |
|  | viii. What is the significance of the CreateProcessAcall at 0x0040106E?  |
|  | <b>f. Analyze the malware found in the file Lab09-03.exe using OllyDbg and IDA Pro. This malware loads three included DLLs (DLL1.dll, DLL2.dll, and DLL3.dll ) that are all built to request the same memory load location. Therefore, when viewing these DLLs in OllyDbg versus IDA Pro, code may appear at different memory locations. The purpose of this lab is to make you comfortable with finding the correct location of code within IDA Pro when you are looking at code in OllyDbg</b> |
|  | i. What DLLs are imported by <i>Lab09-03.exe</i> ?   |
|  | ii. What is the base address requested by <i>DLL1.dll</i> , <i>DLL2.dll</i> , and <i>DLL3.dll</i> ?  |
|  | iii. When you use OllyDbg to debug <i>Lab09-03.exe</i> , what is the assigned based address for: <i>DLL1.dll</i> , <i>DLL2.dll</i> , and <i>DLL3.dll</i> ?   |
|  | iv. When <i>Lab09-03.exe</i> calls animport functionfrom <i>DLL1.dll</i> , whatdoes this import function do?   |
|  | v. When <i>Lab09-03.exe</i> calls WriteFile, what is the filename it writes to?  |
|  | vi. vi. When <i>Lab09-03.exe</i> creates a job using NetScheduleJobAdd, where does it get the data for the second parameter?   |
|  | vii. While running or debugging the program, you will see that it prints out three pieces of mystery data. What are the following: DLL 1 mystery data 1, DLL 2 mystery data 2, and DLL 3 mystery data 3?   |
|  | viii. How can you load <i>DLL2.dll</i> into IDA Pro so that it matches the load address used by OllyDbg?   |

**The Kelkar Education Trust's**  
**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

|    |  |
|----|--|
| 4. | <p><b>a. This lab includes both a driver and an executable. You can run the executable from anywhere, but in order for the program to work properly, the driver must be placed in the C:\Windows\ System32 directory where it was originally found on the victim computer. The executable is Lab10-01.exe, and the driver is Lab10-01.sys.</b></p> <p>i. Does this program make any direct changes to the registry? (Use procmon to check.)</p> <p>ii. The user-space program calls the ControlService function. Can you set a breakpoint with WinDbg to see what is executed in the kernel as a result of the call to ControlService?</p> <p>iii. What does this program do?</p> <p><b>b. The file for this lab is Lab10-02.exe.</b></p> <p>i. Does this program create any files? If so, what are they?</p> <p>ii. Does this program have a kernel component?</p> <p>iii. What does this program do?</p> <p><b>c. This lab includes a driver and an executable. You can run the executable from anywhere, but in order for the program to work properly, the driver must be placed in the C:\Windows\System32 directory where it was originally found on the victim computer. The executable is Lab10-03.exe, and the driver is Lab10-03.sys.</b></p> <p>i. What does this program do?</p> <p>ii. Once this program is running, how do you stop it?</p> <p>iii. What does the kernel component do?</p> |
| 5. | <p><b>a. Analyze the malware found in Lab11-01.exe</b></p> <p>i. What does the malware drop to disk?</p> <p>ii. How does the malware achieve persistence?</p> <p>iii. How does the malware steal user credentials?</p> <p>iv. What does the malware do with stolen credentials?</p> <p>v. How can you use this malware to get user credentials from your test environment?</p> <p><b>b. Analyze the malware found in Lab11-02.dll. Assume that a suspicious file named Lab11-02.ini was also found with this malware.</b></p> <p>i. What are the exports for this DLL malware?</p> <p>ii. What happens after you attempt to install this malware using rundll32.exe?</p> <p>iii. Where must Lab11-02.ini reside in order for the malware to install properly?</p> <p>iv. How is this malware installed for persistence?</p> <p>v. What user-space rootkit technique does this malware employ?</p> <p>vi. What does the hooking code do?</p> <p>vii. Which process(es) does this malware attack and why?</p>  |

|    |  |
|----|--|
|    | viii. What is the significance of the <i>.ini</i> file?  |
|    | <b>c. Analyze the malware found in <i>Lab11-03.exe</i> and <i>Lab11-03.dll</i>. Make sure that both files are in the same directory during analysis</b>  |
|    | i. What interesting analysis leads can you discover using basic static analysis?   |
|    | ii. What happens when you run this malware?  |
|    | iii. How does <i>Lab11-03.exe</i> persistently install <i>Lab11-03.dll</i> ?   |
|    | iv. Which Windows system file does the malware infect?   |
|    | v. What does <i>Lab11-03.dll</i> do?   |
|    | vi. Where does the malware store the data it collects?   |
| 6. | <b>a. Analyze the malware found in the file <i>Lab12-01.exe</i> and <i>Lab12-01.dll</i>. Make sure that these files are in the same directory when performing the analysis.</b>                |
|    | i. What happens when you run the malware executable?   |
|    | ii. What process is being injected?  |
|    | iii. How can you make the malware stop the pop-ups?  |
|    | iv. How does this malware operate?   |
|    | <b>b. Analyze the malware found in the file <i>Lab12-02.exe</i>.</b>   |
|    | i. What is the purpose of this program?  |
|    | ii. How does the launcher program hide execution?  |
|    | iii. Where is the malicious payload stored?  |
|    | iv. How is the malicious payload protected?  |
|    | v. How are strings protected?  |
|    | <b>c. Analyze the malware extracted during the analysis of Lab 12-2, or use the file <i>Lab12-03.exe</i>.</b>  |
|    | i. What is the purpose of this malicious payload?  |
|    | ii. How does the malicious payload inject itself?  |
|    | iii. What filesystem residue does this program create?   |
|    | <b>d. Analyze the malware found in the file <i>Lab12-04.exe</i>.</b>   |
|    | i. What does the code at 0x401000 accomplish?  |
|    | ii. Which process has code injected?   |
|    | iii. What DLL is loaded using LoadLibraryA?  |
|    | iv. What is the fourth argument passed to the CreateRemoteThread call?   |
|    | v. What malware is dropped by the main executable?   |
| 7. | <b>a. Analyze the malware found in the file <i>Lab13-01.exe</i>.</b>   |
|    | i. Compare the strings in the malware (from the output of the strings command) with the information available via dynamic analysis. Based on this comparison, which elements might be encoded? |
|    | ii. Use IDA Pro to look for potential encoding by searching for the string xor. What type of   |

**(Autonomous)**

|    |  |
|----|--|
|    | encoding do you find?  |
|    | iii. What is the key used for encoding and what content does it encode?  |
|    | iv. Use the static tools FindCrypt2, Krypto ANALyzer (KANAL), and the IDA Entropy Plugin to identify any other encoding mechanisms. What do you find?                    |
|    | v. What type of encoding is used for a portion of the network traffic sent by the malware?   |
|    | vi. Where is the Base64 function in the disassembly?   |
|    | vii. What is the maximum length of the Base64-encoded data that is sent? What is encoded?  |
|    | viii. In this malware, would you ever see the padding characters (=or ==) in the Base64-encoded data?  |
|    | ix. What does this malware do?   |
|    | <b>b. Analyze the malware found in the file <i>Lab13-02.exe</i>.</b>   |
|    | i. Using dynamic analysis, determine what this malware creates.  |
|    | ii. Use static techniques such as an xor search, FindCrypt2, KANAL, and the IDA Entropy Plugin to look for potential encoding. What do you find?                         |
|    | iii. Based on your answer to question 1, which imported function would be a good prospect for finding the encoding functions?  |
|    | iv. Where is the encoding function in the disassembly?   |
|    | v. Trace from the encoding function to the source of the encoded content. What is the content?   |
|    | vi. Can you find the algorithm used for encoding? If not, how can you decode the content?  |
|    | vii. Using instrumentation, can you recover the original source of one of the encoded files?   |
|    | <b>c. Analyze the malware found in the file <i>Lab13-03.exe</i>.</b>   |
|    | i. Compare the output of strings with the information available via dynamic analysis. Based on this comparison, which elements might be encoded?                         |
|    | ii. Use static analysis to look for potential encoding by searching for the string xor. What type of encoding do you find?   |
|    | iii. Use static tools like FindCrypt2, KANAL, and the IDA Entropy Plugin to identify any other encoding mechanisms. How do these findings compare with the XOR findings? |
|    | iv. Which two encoding techniques are used in this malware?  |
|    | v. For each encoding technique, what is the key?   |
|    | vi. For the cryptographic encryption algorithm, is the key sufficient? What else must be known?  |
|    | vii. What does this malware do?  |
|    | viii. Create code to decrypt some of the content produced during dynamic analysis. What is this content?   |
| 8. | <b>a. Analyze the malware found in file <i>Lab14-01.exe</i>. This program is not harmful to your system.</b>   |

**(Autonomous)**

|  |   |
|--|---|
|  | i. Which networking libraries does the malware use, and what are their advantages?  |
|  | ii. What source elements are used to construct the networking beacon, and what conditions would cause the beacon to change?   |
|  | iii. Why might the information embedded in the networking beacon be of interest to the attacker?  |
|  | iv. Does the malware use standard Base64 encoding? If not, how is the encoding unusual?   |
|  | v. What is the overall purpose of this malware?   |
|  | vi. What elements of the malware's communication may be effectively detected using a network signature?   |
|  | vii. What mistakes might analysts make in trying to develop a signature for this malware?   |
|  | viii. What set of signatures would detect this malware (and future variants)?   |
|  | <b>b. Analyze the malware found in file <i>Lab14-02.exe</i>. This malware has been configured to beacon to a hard-coded loopback address in order to prevent it from harming your system, but imagine that it is a hard-coded external address.</b> |
|  | i. What are the advantages or disadvantages of coding malware to use direct IP addresses?   |
|  | ii. Which networking libraries does this malware use? What are the advantages or disadvantages of<br>a. using these libraries?  |
|  | iii. What is the source of the URL that the malware uses for beaconing? What advantages does this source offer?   |
|  | iv. Which aspect of the HTTP protocol does the malware leverage to achieve its objectives?  |
|  | v. What kind of information is communicated in the malware's initial beacon?  |
|  | vi. What are some disadvantages in the design of this malware's communication channels?   |
|  | vii. Is the malware's encoding scheme standard?   |
|  | viii. How is communication terminated?  |
|  | ix. What is the purpose of this malware, and what role might it play in the attacker's arsenal?   |
|  | <b>c. This lab builds on Practical 8 a. Imagine that this malware is an attempt by the attacker to improve his techniques. Analyze the malware found in file <i>Lab14-03.exe</i>.</b>   |
|  | i. What hard-coded elements are used in the initial beacon? What elements, if any, would make a good signature?   |
|  | ii. What elements of the initial beacon may not be conducive to a longlasting signature?  |
|  | iii. How does the malware obtain commands? What example from the chapter used a similar methodology? What are the advantages of this technique?   |
|  | iv. When the malware receives input, what checks are performed on the input to determine whether it is a valid command? How does the attacker hide the list of commands the malware is searching for?   |

|    |  |
|----|--|
|    | v. What type of encoding is used for command arguments? How is it different from Base64, and what advantages or disadvantages does it offer?   |
|    | vi. What commands are available to this malware?   |
|    | vii. What is the purpose of this malware?  |
|    | viii. This chapter introduced the idea of targeting different areas of code with independent signatures (where possible) in order to add resiliency to network indicators. What are some distinct areas of <ol style="list-style-type: none"> <li>a. code or configuration data that can be targeted by network signatures?</li> </ol>   |
|    | ix. What set of signatures should be used for this malware?  |
|    | <b>d. Analyze the sample found in the file Lab15-01.exe. This is a command-line program that takes an argument and prints “Good Job!” if the argument matches a secret code.</b>   |
|    | <ol style="list-style-type: none"> <li>i. What anti-disassembly technique is used in this binary?</li> <li>ii. What rogue opcode is the disassembly tricked into disassembling?</li> <li>iii. How many times is this technique used?</li> <li>iv. What command-line argument will cause the program to print “Good Job!”?</li> </ol>   |
|    | <b>e. Analyze the malware found in the file Lab15-02.exe. Correct all anti-disassembly countermeasures before analyzing the binary in order to answer the questions.</b>   |
|    | <ol style="list-style-type: none"> <li>i. What URL is initially requested by the program?</li> <li>ii. How is the User-Agent generated?</li> <li>iii. What does the program look for in the page it initially requests?</li> <li>iv. What does the program do with the information it extracts from the page?</li> </ol>   |
|    | <b>f. Analyze the malware found in the file Lab15-03.exe. At first glance, this binary appears to be a legitimate tool, but it actually contains more functionality than advertised.</b>   |
|    | <ol style="list-style-type: none"> <li>i. How is the malicious code initially called?</li> <li>ii. What does the malicious code do?</li> <li>iii. What URL does the malware use?</li> <li>iv. What filename does the malware use?</li> </ol>   |
| 9. | <b>a. Analyze the malware found in Lab16-01.exe using a debugger. This is the same malware as Lab09-01.exe, with added anti-debugging techniques.</b>  |
|    | <ol style="list-style-type: none"> <li>i. Which anti-debugging techniques does this malware employ?</li> <li>ii. What happens when each anti-debugging technique succeeds?</li> <li>iii. How can you get around these anti-debugging techniques?</li> <li>iv. How do you manually change the structures checked during runtime?</li> <li>v. Which OllyDbg plug-in will protect you from the anti-debugging techniques used by this malware?</li> </ol> |
|    | <b>b. Analyze the malware found in Lab16-02.exe using a debugger. The goal of this lab is</b>  |

**Course Objective**

**To make learners**

1. Understand the process of creation and management of the cloud.
2. Get the knowledge of deployment of server manager, management of Configuration Manager etc.
3. Understand the working of an Orchestrator.
4. Get the knowledge of handling of DPM.
5. Understand System Center 2019 and its different components.

**List of Practical:**

|    |  |
|----|--|
| 1. | a. Create and Manage Cloud using SCVMM 2019<br>b. Deploy a guarded host fabric using Microsoft SCVMM 2019  |
| 2. | a. Deploy and manage SDN Infra structure using SCVMM 2019<br>b. Deploy and Manage Storage Space Direct (S2D) using SCVMM 2019  |
| 3. | a. Deploy Service Manager 2019 and install on 4 Computer Scenario<br>b. Setup SQL Server reporting Service using Service Manager 2019  |
| 4, | a. User Connectors to import data: <ol style="list-style-type: none"> <li>i. Import data from Active Directory Domain Services</li> <li>ii. Import data and alerts from Operations Manager</li> <li>iii. Import data from Configuration Manager</li> <li>iv. Import runbooks from Orchestrator</li> <li>v. Import data from VMM</li> <li>vi. Use a CSV file to import data</li> </ol> b. Automate IT processes with workflows <ol style="list-style-type: none"> <li>i. Add or remove workflow activities</li> <li>ii. Configure the way activities manage and pass information</li> <li>iii. Deploy a workflow to Service Manager using the Authoring Tool</li> <li>iv. Configure the Activities Toolbox in the Authoring Tool</li> </ol> |

**Course Objective**

To make learners

1. Understand concepts of geometric transformations, image stitching, camera calibration
2. To introduce the fundamentals of image formation
3. To develop an appreciation for various issues in the design of computer vision and object recognition systems
4. Understanding of the issues involved in trying to define and simulate perception.
5. Familiarize with specific, well known computer vision methods, algorithms and results.

**List of Practical:**

|     |   |
|-----|---|
| 1.  | Perform Geometric transformations.  |
| 2.  | Perform Image Stitching.  |
| 3.  | Perform Camera Calibration.   |
| 4,  | Perform the following: <ol style="list-style-type: none"> <li>a. Face detection</li> <li>b. Object detection</li> <li>c. Pedestrian detection</li> <li>d. Face recognition</li> </ol> |
| 5.  | Construct 3D model from images.   |
| 6.  | Implement object detection and tracking from video.   |
| 7.  | Perform Feature extraction using RANSAC.  |
| 8.  | Perform Colorization.   |
| 9.  | Perform Text detection and recognition.   |
| 10. | Perform Image matting and Composting.   |

**V G Vaze College of Arts, Science and Commerce**  
**(Autonomous)**

| <b>Course Outcome</b>          |  |
|--------------------------------|--|
| <b>Learner will be able to</b> |  |
| <b>CO1</b>                     | Understand the basics of computer vision   |
| <b>CO2</b>                     | Understand and analyse various structure from motion and various estimates of Dense Motion                       |
| <b>CO3</b>                     | Apply various motion models to images and understand computation photography techniques                          |
| <b>CO4</b>                     | Apply Epipolar geometry , Rectification and various other 3D correspondence and Stereo reconstruction techniques |
| <b>CO5</b>                     | Understand image-based rendering and reconstruction.   |

| <b>Books and References:</b> |   |                  |           |                            |      |

**Evaluation Scheme**

**1. Internal Evaluation (40 marks).**

- i. Test: 1 Class test of 15 marks. (Can be taken online)

|    |  |    |
|----|--|----|
| Q  | Attempt <u>any three</u> of the following: | 15 |
| a. |  |    |
| b. |  |    |
| c. |  |    |
| d. |  |    |
| e. |  |    |
| f. |  |    |

- ii. 15 marks project/presentation/assignment.  
iii. 10 marks: Active participation in the class, overall conduct, attendance.

**2. External Examination: (60marks)(2 credit course)**

|                              |   |    |
|------------------------------|---|----|
| All questions are compulsory |   |    |
| Q.1.                         | (Based on Unit 1) Attempt <u>any four</u> of the following:         | 20 |
| a.                           |   |    |
| b.                           |   |    |
| ..                           |   |    |
| f.                           |   |    |
| Q.2.                         | (Based on Unit 2) Attempt <u>any four</u> of the following:         | 20 |
| Q.3.                         | (Based on whole syllabus) Attempt <u>any four</u> of the following: | 20 |

**External Examination: (60marks)(4 credit course)**

|                              |  |    |
|------------------------------|--|----|
| All questions are compulsory |  |    |
| Q.1.                         | (Based on Unit 1) Attempt <u>any three</u> of the following: | 15 |
| a.                           |  |    |
| b.                           |  |    |
| ...                          |  |    |
| f.                           |  |    |
| Q.2.                         | (Based on Unit 2) Attempt <u>any three</u> of the following: | 15 |
| Q.3.                         | (Based on Unit 3) Attempt <u>any three</u> of the following: | 15 |
| Q.4.                         | (Based on Unit 4) Attempt <u>any three</u> of the following: | 15 |
