## ABOUT THE CONFERENCE

Fashion is a statement, a schematic manifestation, which is flaunted to identify an individual, a location, a period, a grade, a rank, a class, a creed, a philosophy, an ethnicity, subcultures and even a nation. Fashion is about self expression, personal style and creativity. It can be found across a wide range of price points and contexts. While fashion includes luxury elements, such as designer labels and high-quality materials, it also extends to more accessible and affordable options found in mainstream retail. Fashion transcends mere clothing, elevating individuals into icons of beauty and style. Cities and buildings become beacons of fashion, each with its unique identity and influence and malls become fashion destinations. Behind the glamour, fashion is a formidable global industry generating billions of dollars annually, providing livelihoods for millions worldwide. It is a testament to the power of creativity, commerce and culture intertwining on a global scale.
